DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
2. Group I. Claims 1-17 and 29-32, drawn to a receiver set, classified in Class 370, subclass 486.
3. Group II. Claims 18-28, drawn to an information apparatus, classified in Class 725, subclass 139.
4. The inventions are distinct, each from the other because of the following reasons:
5. Inventions receiver set and information apparatus are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the receiver set can work with any information apparatus, not just the one claimed in the instant application. The subcombination has separate utility such as working with or without a receiver set or working with a different receiver set than the one claimed.
6. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
